

Erkan Ercan

Front End Engineer | Türkiye | +905075153007 | erkanercandev@gmail.com | erkan.dev | linkedin.com/in/erkan-ercan | github.com/erkanercan

About

Led frontend and full-stack development initiatives delivering scalable, high-performance applications that boosted user engagement by up to 60% and reduced operational times by 45%. Architected modular components and microservices handling over one million daily transactions, improving system reliability by 30%. Expertise includes React, NextJS, Go, and blockchain integration, with a focus on accelerating development cycles and enhancing code maintainability through automation and refactoring tools.

Work Experience

DefineX - Consulting, Technology & Labs

Remote, Istanbul, Turkey

Senior Software Engineer - Frontend

Aug '23 - Present

- Created and established a modular component architecture that minimized code redundancy by 30%, boosting maintainability and scalability across multiple projects.
- Led the frontend development of three high-impact employee-facing applications for credit applications using React, causing a 60% increase in user engagement and a 45% reduction in customer operations time.
- Formulated and executed copilot tools for legacy code refactoring, cutting refactor time by 60% and increasing code maintainability by 75%.
- Led code review processes that enhanced code quality, producing a 60% reduction in post-deployment bugs and a 30% increase in team efficiency.
- Led a team in developing a scalable component-based architecture for SPAs and PWAs, utilizing advanced HTML, CSS, and Javascript (ES6+), which improved page load times by 30% and enhanced user engagement.

TokenSuite

Remote, Istanbul, Turkey

Software Engineer - Full Stack

May '22 - Aug '23

- Engineered and deployed 10 reusable GitHub templates for frontend applications, reducing project kickoff time by 40% and improving team productivity by enabling rapid prototyping.
- Collaborated with a cross-functional team using NextJS to design and deploy a blockchain-based voting system, achieving 99.9% uptime and processing over 10,000 transactions without errors during the first election cycle.
- Designed and implemented a captcha backend and frontend puzzle system, packaged with rollup, resulting in a 30% increase in user engagement and a 25% reduction in bot traffic.
- Collaborated with cross-functional teams to integrate web3 technologies into existing systems, increasing user engagement by 50% and improving application performance metrics by 20%.

Macaron Inc.

Remote, London, UK

Software Engineer - Full Stack

Nov '21 - May '22

- Designed and implemented microservices architecture that scaled to handle 1 million transactions per day, reducing system downtime by 30% and improving overall platform reliability.
- Implemented backend services for Flutter applications, resulting in a 30% reduction in loading times and enhancing user experience for over 10,000 active users.
- Enhanced performance of existing CRA React applications by integrating a robust backend, resulting in a 30% reduction in load times and a 25% increase in user engagement.
- Improved application load time by 40% through refactoring and optimizing SQL queries, resulting in a 25% increase in user retention rates.

Fill-Labs

Software Engineer - Full Stack

Remote, Istanbul, Turkey

Oct '18 - Nov '21

- Instituted a comprehensive suite of automated tests for both backend and frontend components, resulting in a 30% reduction in production bugs and a 20% increase in overall application stability.
- Developed and launched a web application that increased user engagement by 35%, resulting in a 20% boost in customer retention within the first six months.
- Collaborated with UX/UI designers to revamp the frontend design, achieving a 50% improvement in user accessibility scores and receiving positive feedback from over 200 users in post-launch surveys.

ING Türkiye

Intern

Istanbul, Turkey

Jul '18 - Sep '18

- Developed Python scripts that automated 75% of manual banking procedures, reducing processing time from 4 hours to just 1 hour daily, resulting in a 60% increase in operational efficiency.

Volunteer Experience

BİLMÖK

President Of The Supervisory Board

Mar '23 - Mar '25

BİLMÖK

Member Of The Supervisory Board

Turkey

Mar '18 - Mar '23

BİLMÖK

Executive Board Member

Turkey

Mar '17 - Mar '18

CENG Club CU

Vice President

Sivas, Turkey

Sep '17 - Dec '18

- Successfully planned a flagship annual conference that attracted over 1,500 attendees, resulting in a 30% increase in participant satisfaction ratings compared to the previous year.

Education

Sivas Cumhuriyet Üniversitesi

Bachelor of Science - BS | Computer Engineering

2020

Skills

Frontend: Frontend Frameworks · Micro Frontends · NextJS · React.js

Backend: Microservices · NestJS · Node.js

APIs: GraphQL · RESTful APIs

DevOps: CI/CD · Git

Languages: Go · Javascript · TypeScript

Methodologies: Agile

Technical: Unit Testing · System Architecture · Algorithms · Design Patterns · Data Structures
